Don't be fooled by cheap imitations!

All of our cutting mats are 3mm thick and have 3 layers sandwiched together

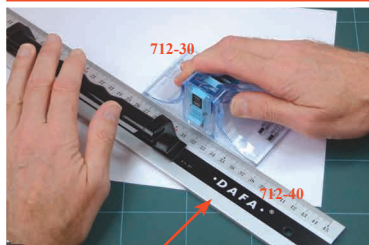

Cheaper mats are usually thinner, or only 2 layers thick - or both!

It is this thick 3 layer construction that give our mats their long durability.

For normal hobby use they often last a lifetime!

When you consider increased blade life, improved accuracy of cuts, and protection offered to work surfaces, our cutting mats are a fine investment.
