Price: £10.00

CODE:
760-01

Bench
Hook with
Clamp
(saw not
included)

CODE: 760-01

-allows easy cutting of intricate shapes in sheet materials - suitable for use with Piercing Saws & Fretsaws PRICE: £6.95

Tensioning method for fretsaw & piercing saw blades:

1. Loosen wing screw at both ends of saw frame.
2. Insert one end of blade into the front clamp of the saw and fully tighten.
3. Next, push the frame firmly against the bench edge so that the frame is squeezed slightly. Now insert the other end of the blade and tighten the clamp.

A range of superior (Swiss made) Piercing Saw Blades.

They are round backed, and made from hardened & tempered steel.

Suitable for cutting metals, bone, pearl etc.

All packs contain 12 blades:
